

This is a DRAFT ISO. This is not an invitation for solution summaries or proposals. Any such response will be disregarded. ARPA-H will not comment nor provide feedback on questions related to proposal technical approaches.

INNOVATIVE SOLUTIONS OPENING FOR

DELPHI

RESILIENT SYSTEMS OFFICE

ARPA-H-SOL-26-153

MARCH 10, 2026

This is a DRAFT ISO. This is not an invitation for solution summaries or proposals. Any such response will be disregarded. ARPA-H will not comment nor provide feedback on questions related to proposal technical approaches.

## TABLE OF CONTENTS

|       |   |   |
|-------|---|---|
| 1.    | PROPOSERS DAY.....  | 3 |
| 2.    | INTRODUCTION TO Delphi .....  | 3 |
| 3.    | ELIGIBILITY INFORMATION.....  | 3 |
| 3.X   | ELIGIBLE PROPOSERS.....   | 3 |
| 3.X.X | PROHIBITION ON PARTICIPATION BY FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS (FFRDCS) AND GOVERNMENT ENTITIES..... | 3 |
| 3.X.X | CURRENT PROFESSIONAL SUPPORT TO ARPA-H.....   | 4 |
| 3.X.X | FOREIGN ENTITIES .....  | 4 |
| 3.X   | SYSTEM FOR AWARD MANAGEMENT (SAM.GOV) .....   | 5 |
| 4.    | SUBMISSION PROCESS .....  | 5 |
| 4.1   | OVERVIEW.....   | 5 |
| 4.2   | SOLUTION SUMMARIES.....   | 5 |
| 4.3   | SOLUTION SUMMARY REVIEW .....   | 5 |
| 4.4   | PROPOSAL SUBMISSION REVIEW.....   | 6 |
| 4.5   | PROPRIETARY INFORMATION.....  | 6 |

APPENDIX A: PROGRAM AND TECHNICAL DESCRIPTION

APPENDIX B: SOLUTIONS SUMMARY MODEL

APPENDIX C: PROPOSAL FORMAT, INSTRUCTIONS, AND EVALUATION

APPENDIX C.1: TECHNICAL & MANAGEMENT PROPOSAL MODEL

APPENDIX C.2: TASK DESCRIPTION DOCUMENT (TDD) MODEL

APPENDIX C.3: COST PROPOSAL MODEL

APPENDIX D: ADMINISTRATIVE & NATIONAL POLICY REQUIREMENTS DOCUMENT FOR OTHER TRANSACTION AGREEMENTS

APPENDIX E: DRAFT OT AGREEMENT

## INNOVATIVE SOLUTIONS OPENING (ISO) SUMMARY INFORMATION

**FEDERAL AGENCY:** Advanced Research Projects Agency for Health (ARPA-H)

**PROGRAM TITLE:** Delphi

**ANNOUNCEMENT TYPE:** Innovative Solutions Opening (ISO)

**ISO NUMBER:** ARPA-H-SOL-26-153

**POINTS OF CONTACT (POCs):** Paul Sheehan, Delphi Program Manager, Resilient Systems Office (RSO). The ISO Coordinator for this effort can be reached at: DELPHI@arpa-h.gov, ATTN: DELPHI ISO

**ANTICIPATED AWARD(S):**

Multiple Other Transaction (OTs) Agreements

**DATES:** (All times listed are Eastern Time)

Proposer's Day: [03/27/2026](#)

Solution Summaries due date: [04/08/2026, 5:00 PM](#)

Proposals due date: [05/13/2026, 5:00 PM](#)

**WHERE TO SUBMIT:**

Solution Summaries: <https://solutions.arpa-h.gov/Submit-Solution/>

Questions: <https://solutions.arpa-h.gov/Ask-A-Question/>

Proposals: <https://solutions.arpa-h.gov/Submit-Proposal/>

Registration is required to submit documents via the ARPA-H Solution Submission Portal, which may take several business days. Plan to register well in advance of the Solution Summary submission deadline; late submissions resulting solely from delays with registration may not be considered.

**RESOURCE SHARING:** Resource sharing is encouraged.

## 1. **PROPOSERS DAY**

ARPA-H will host a Proposers Day in support of the Delphi program described in this ISO. The purpose of the engagement is to provide information, promote discussion, and encourage teaming and networking. Attendance is voluntary (but highly encouraged). All materials presented will be posted to the ARPA-H Delphi program website. ARPA-H will not reimburse entities for the cost of attendance.

## 2. **INTRODUCTION TO Delphi**

Today, the lack of deep biological insight—such as continuous monitoring of hormones, cytokines, and drug levels—contributes to preventable disease progression, missed opportunities for early intervention, and limited personal health agency. Emerging wearable technologies could close this gap by providing real-time physiological data, enabling individuals and clinicians to recognize early warning signs, tailor treatments, and adjust behaviors in the moment rather than after damage has occurred. Consequently, Delphi seeks to empower all Americans to fully understand their body by providing this information. This will require a revolution in the cost and performance of biosensors. The program will leverage chiplets, a new system architecture in microelectronics, to greatly decrease cost, reduce size, weight, and power (SWaP), and enable all developers to access cutting edge capabilities. By the end, Delphi will quickly and cheaply develop modular wearable or ingestible sensors for monitoring of a broad range of biological markers. The benefits include early detection to prevent disease progression, continuous monitoring for safe home recovery, and precision, closed-loop therapy for superior health outcomes.

## 3. **ELIGIBILITY INFORMATION**

### 3.1 **ELIGIBLE PROPOSERS**

Except as noted herein, all sources that can satisfy the government's needs and that are neither debarred nor suspended from doing business with the government may respond to this ISO. Universities, non-profit organizations, small businesses and other commercial entities are encouraged to respond.

#### 3.1.1 **PROHIBITION ON PARTICIPATION BY FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS (FFRDCS) AND GOVERNMENT ENTITIES**

- (a) ARPA-H is primarily interested in responses to this solicitation from commercial entities, academia, and non-profit organizations. ARPA-H is not interested in responses from federal or state

governments. As such, Federally Funded Research and Development Centers (FFRDCs) and government entities (which includes government employees) **will not be considered** as either the prime or a sub-performer.

- (b) However, an FFRDC or government entity may have unique capabilities that are not otherwise available. Accordingly, when a potential prime performer believes an FFRDC has a unique capability without which its solution is unachievable, it may provide documentation demonstrating it has exhausted all other options as part of its submission(s). ARPA-H will determine whether inclusion of the FFRDC is necessary for the Solution.
- (c) If an FFRDC or government entity is interested in working directly with the ARPA-H team supporting the research described by this ISO, contact DELPHI@arpa-h.gov for guidance.

### 3.1.2 CURRENT PROFESSIONAL SUPPORT TO ARPA-H

Support services involve contracted labor providing technical, professional, and/or financial expertise, and/or administrative assistance. Individuals and entities providing support services to ARPA-H are ineligible for an award stemming from this ISO.

### 3.1.3 FOREIGN ENTITIES

While ARPA-H prioritizes awards to entities (organizations and/or individuals) that conduct funded work in the United States, foreign entities may participate to the extent that they comply with non-disclosure agreements, security regulations, export control laws, and other governing statutes applicable under the circumstances. In no case will award be made to:

- An entity of concern meeting any of the criteria in Section 10638(3) of the CHIPS and Science Act of 2022;
- An individual who is a party to a malign foreign talent recruitment program (MFTRP) as defined in Section 10638(4) of the CHIPS and Science Act of 2022;
- Non-domestic entities organized under the laws of a “covered” foreign country (as defined in 50 U.S.C. § 3059); or

### 3.2 SYSTEM FOR AWARD MANAGEMENT (SAM.GOV)

At the time of proposal submission, the proposer must be registered in the System for Award Management (SAM.gov) and have a valid Unique Entity Identifier (UEI). Proposers must also have an active, accurate registration in SAM.gov at the time of award and through its expiration. SAM.gov requires certain information to register and obtain a UEI (e.g., Taxpayer Identification Number, Electronic Funds Transfer info, etc.); go to SAM.gov and click the "Get Started" button on the home screen to begin the registration process. New registrations take an average of 7-10 business days.

## 4. SUBMISSION PROCESS

### 4.1 OVERVIEW

Non-Gated Solution Summary processes involve:

**Step 1:** Submit Solution Summary (Potential proposers are encouraged or discouraged to move to Step 2).

**Step 2:** Potential proposers are provided feedback encouraging or discouraging the submission of a proposal.

**Step 3:** Proposers decide if they still wish to submit a proposal in accordance with this ISO.

### 4.2 SOLUTION SUMMARIES

Solution Summary submissions are **required** and due by the date listed in the ISO Summary Information Section. (See Appendix B for the Solution Summary Format and Instructions) All Solution Summaries must be in English, single spaced, with a *sans serif* font type NO smaller than 11-point and with a readability similar to that of Calibri, Arial, or Avenir Next Pro Light. Narrow fonts are not allowed. Smaller *sans serif* fonts may be used for figures, tables, and charts. Solution Summaries have a limit of **six (6)** pages (the cover pages (company profile pages) and the References-Cited section do not count toward the six-page limit). Content in blue font is only recommended for use and should be deleted by the proposer before submitting a Solution Summary.

### 4.3 SOLUTION SUMMARY REVIEW

ARPA-H will review and respond to each Solution Summary submission. Solution Summaries will be reviewed for the purpose of providing feedback regarding whether ARPA-H is interested in the Solution Summary solution/concept. At a minimum, the government's response will indicate whether submission of a proposal is encouraged or discouraged. Although a proposal may be submitted

regardless of the feedback provided, potential proposers are advised to give the government's decision significant weight when making decisions regarding whether it is worth the investment of time and resources in the development of a proposal.

It is ARPA-H's intent to protect all solution summaries and to disclose their contents only for the purpose of review, and only to screened personnel for authorized reasons, in accordance with applicable federal laws and regulations, including Freedom of Information Act (FOIA). Restrictive notices notwithstanding, submissions may be handled by ARPA-H support contractors during the review process for administrative purposes and/or to assist with technical review.

ARPA-H support contractors are expressly prohibited from performing ARPA-H-sponsored technical research and are bound by appropriate non-disclosure agreements. Input on technical aspects of a solution summaries may be solicited by ARPA-H from non-government consultants/experts who are strictly bound by appropriate non-disclosure requirements.

When large language models (LLMs) are used (to extract data elements, summarize text, and generate text), all data will be transmitted exclusively through secure API calls, with external tool calls such as web searches disabled. Vendor contracts and technical controls enforce strict security measures: data sent for inference is never used to train public models, and all access, retention, and logging are tightly restricted and fully auditable.

#### **4.4 PROPOSAL SUBMISSION REVIEW**

After completing a Solution Summary review, ARPA-H will notify each proposer whether it is 'encouraged' to or 'discouraged' from submitting a proposal. Please see Appendix C for additional details.

#### **4.5 PROPRIETARY INFORMATION**

The proposer is responsible for identifying all proprietary information therein. Submissions containing proprietary information must clearly mark the cover page and each page that contains such information with a label such as "Proprietary".

NOTE: "Confidential" is a classification marking used to control the dissemination of information related to National Security and should not be used to identify proprietary business information. ARPA-H handles submissions in accordance with applicable federal law, including the

Freedom of Information Act (FOIA).
